

Honeywell Command & Control Suit for Emergency Response

Goel, Sumeet[†]

Honeywell

(miran.kim@honeywell.com[†])

Honeywell's Plant and Personnel Safety Solutions are a comprehensive and truly integrated suite of safety and security solutions. They deliver Safety Shutdown, Fire & Gas, Physical and Cyber Security, Personnel Protection and Alarm Management holistically across process facilities. They include independent, yet interrelated, layers of protection to prevent, detect and mitigate potential safety and security risks and threats. Together, these solutions ensure that process, plant, people and environment are safer and more secure than ever before.

Plant and Personnel Safety Solutions deliver the following benefits:

Meaningful information to decision makers in industrial environments

Increased protection through a layered approach

Increased situational awareness

Improved decision-making for faster response to incidents

Historical data collection and trending for root cause analysis

Eliminate islands of automation

Reduced total cost of ownership

A safer and more secure work environment
